## Qualitative Feedback – Themes

- More bullish on a bounce back in the fall vs. summer.
- Still a lot of uncertainty over the next 3-6 months.
- “A unified, international standard for acceptable COVID travel rules (i.e., International COVID Vaccination Passports) adopted by ICAO, IATA, WHO or a recognized international travel authority would be a great help.”
- Have patience and double check everything.
- Handlers aren’t operating at same level as pre-pandemic.
